The X100S sees Fujifilm revisiting the concept, but while the external design is essentially unchanged, it's a very different camera inside. It uses a 16.3MP X-Trans CMOS sensor similar to that seen in the interchangeable lens X-Pro1 and X-E1 models, but now with on-chip phase detection promising much-improved autofocus speed. This is supported by a new processor, the EXR Processor II, which ...

I had to search around for the iso control in the menu and then fixed the control to the front dial. I turned off the touch screen, but that is a matter of preference. Photographs, which are largely down to the lens, are crisp and sharp, with the usual good colours that Fuji cameras produce see my lens review for some test shots.
