Many standard DOHC Nissan engines featured Variable Valve Timing, such as the VG30DETT, and as such do not use the "V" designation. "V" designation is only if the engine has variable valve lift. A good example of an engine where not all of the feature designation spots are used is the L28ET engine. The two features listed are electronic port ...

Nissan VQ35DE Engine Problems and Reliability. 1. High oil consumption. Catalysts of the VQ35DE are very sensitive to fuel quality. They produce ceramic dust, which damages the cylinders and piston rings. As a result, the engine has low compression, high fuel and oil consumption, and other dead engine symptoms. 2. Engine overheating.
